The chemical structure shows a six-membered ring with alternating carbon (C) and nitrogen (N) atoms. The ring is saturated, with single bonds between adjacent atoms. Each nitrogen atom is bonded to a hydrogen atom (H) outside the ring. The carbon atoms are also bonded to hydrogen atoms, with one carbon having two hydrogens and the other three having one hydrogen each, arranged in a way that suggests a specific stereochemistry or conformation. The overall structure is a hexahydro-1,3,5-triazine derivative.

C#NCC1NCCN1

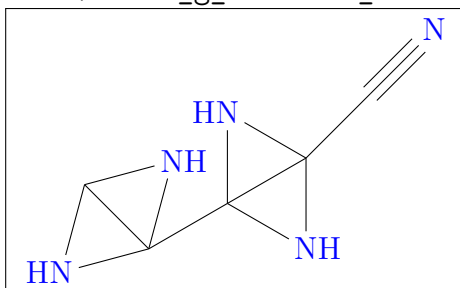

The chemical structure shows a bicyclic system. The left ring is a five-membered ring with three nitrogen atoms and two carbon atoms. It is fused to a six-membered ring on the right, which contains two nitrogen atoms and four carbon atoms. The structure is drawn with explicit bonds and lone pairs on the nitrogen atoms.
